From my perspective, what he did was a bit dangerous. That is why, I think there is a big chance that he will fall down the manhole. When we are too focused on doing something, it is difficult to notice the things around us. So in my opinion, he will face a terrible situation. Because of what happened, I believe he will be more careful and will avoid using his cell phone while walking next time.

### Example

Traveling is one of the things people do to take a break from their everyday routine. It is beneficial for a variety of reasons. However, deciding whether to go on a solo trip or in a group is something that you need to take into consideration. Both have their own pros and cons. Personally, I prefer traveling alone. When I travel alone, I like to think of myself as the boss. I call the shots and I don't have to make compromises. I have the freedom to do things at my own pace and appreciate the things that bring me joy and satisfaction. Exploring new destinations will allow me to rely on myself in challenging situations, trust my own heart and make my own choices. Moreover, it will help me realize that I am capable of doing everything I set my mind to only if I keep going. Lastly, traveling alone will help me turn myself into a more confident person in the future.

#### Example

Double-checking is an easy thing to do, but we often forget to do so. This is what happened to the man. From my standpoint, he will be a bit disappointed in himself. In spite of being disappointed, he will choose not to go back home. I think it will be a waste of time and effort for him, if he returns home. Even without his wallet, he can still use his time efficiently at the shopping mall. Since he is already there, he thinks might as well look for the best gift for his wife. If he allots a lot of time to find the perfect gift, his wife will be very happy. He will just go back to the mall again to buy the gift that he thinks will suit his wife well. Finally, this experience will serve as a lesson to the man.
